- Get industry-specific market analysis and recommendations daily
- Easy to follow charts allow you to make informed decisions to earn better margins per acre, head or cwt.
- Our clear, concise guidance is designed for all levels of marketers: novices, experts and cash and futures traders.

QuickRoots™ Certificate Program

Join SDCGA at the 3-year or Lifetime level and receive a certificate towards a \$100 minimum purchase of QuickRoots™—\$25 certificate for a 3-year membership or \$50 for a lifetime membership.

About Quickroots™

The microorganisms in QuickRoots™ have been shown to increase availability of certain plant nutrients and can increase plant nutrient uptake. QuickRoots™ releases plant available phosphorous which has been shown to increase root mass allowing the plant to explore a greater volume of soil. Increased plant nutrient availability will often lead to increased plant health and vigor which can translate into a yield response.

QuickRoots™ is applied to the seed. QuickRoots™ can be used in a wet or dry form and may even be applied to the seed up to 18 months in advance of planting. For more information, contact TJ Technologies, Inc. at 1-866-819-8231 or visit the website at www.tjmicromix.com
